EDUCATION

Bachelor of Science in Computer Science

Cagayan State University - Carig Campus

Tuguegarao City, Cagayan

September 2022 – March 2026

WORK EXPERIENCE

Commercial Technology Intern | Agile (Scrum), MoSCoW, SIPOC

Dec 2025 – Feb 2026

Golden Suntec Solutions Inc.

- Worked in an Agile (Scrum) environment, participating in daily stand-up meetings and collaborative sprint planning to support team-based ERP implementations.
- Applied MoSCoW prioritization and SIPOC process mapping techniques learned during OJT to assist in analyzing client requirements and documenting business workflows.
- Customized and tested Odoo ERP modules for business deployments, ensuring reliable client-ready implementations and reducing post-deployment issues.
- Optimized structured data migration workflows, reducing client data import time from 4 days to 1 day (80% faster), accelerating onboarding and improving project turnaround time.
- Developed Python JSON-RPC automation scripts on Ubuntu to streamline bulk record validation and insertion, reducing errors and accelerating data processing.
- Developed reusable open-source CLI tools to standardize Odoo import processes, reducing demo instance setup time from 2–3 hours to 10–15 minutes and enabling faster client presentations.
- Managed Dockerized Ubuntu environments and performed pre-deployment QA, improving deployment consistency and reducing environment-related configuration issues.
- Participated in client-facing meetings and marketing demonstrations to showcase ERP capabilities and support business acquisition efforts.

Freelance Graphic Designer

Dec 2020 – Nov 2021

Remote

- Created custom T-shirt designs and social media visuals for local brands using Photoshop, Illustrator, and Canva
- Collaborated directly with clients to translate branding concepts into digital designs

PROJECTS

Odoo-Data-Flow (Open Source) | Python, PostgreSQL, CLI Automation, Docker, Git

Jan 2026 – Feb 2026

- Designed a structured 3-stage data import pipeline for migrating external datasets into Odoo via JSON-RPC, improving data migration speed by **80%**
- Developed a configurable CLI wrapper that streamlined command execution, reducing setup time and improving developer productivity.
- Automated bulk record insertion with validation checks, reducing schema mismatch errors and import failures while increasing data accuracy.

TravelOps | React, Node.js, Express, MongoDB, Email APIs, Tailwind CSS

Dec 2025 – Jan 2026

- Developed a travel booking and management platform for agencies, enabling real-time tracking of bookings, payments, and guest arrivals, contributing to increased revenue opportunities.
- Implemented automated downpayment calculations, invoice generation, and email tracking, accelerating invoicing workflows by **70%** and reducing payment discrepancies.
- Built scalable CRM and workflow automation tools, streamlining business processes and improving client handling speed by **60%**.

CookMe | Next.js, TypeScript, AI (Gemini/Vertex AI), PDF Processing

Mar 2026 – April 2026

- Built an AI-powered interview prep platform that analyzes job descriptions and resumes to generate hyper-personalized mock interviews.
- Implemented tech stack extraction and AI-driven question generation, producing behavioral, technical, and scenario-based questions tailored to target roles.
- Developed real-world coding challenges, database scenarios, and PDF export functionality to simulate actual technical assessments and enable offline review.

CERTIFICATIONS & AWARDS

Introduction to Modern AI

Cisco Network Academy

January 2026

ICT Competition: Web Design – 1st Runner Up

Isabela State University – Echague

April 2025

Civil Service Eligible (Professional)

Philippine Civil Service Commission

March 2025

TECHNICAL SKILLS

Languages (Primary): TypeScript, JavaScript, Python, C#, C++, Dart, SQL, PHP

Frameworks & Libraries: React, Next.js, Node.js, Flutter, Ionic/Angular, Tailwind CSS, Laravel, .NET, Expo (Expo Go)

Other: Odoo (Module Customization, QWeb XML, Testing, Data Migration), n8n (Workflow Automation), Supabase, Firebase, Docker, Ubuntu, Git, GitHub, Vercel, Render, Google Cloud Platform, REST APIs, JSON, Responsive UI Design
